

MP-2B Grinder Polisher

Description:

- ☞ This grinder polisher is of double discs. It is suitable for pre-grinding, grinding and polishing metallographic specimens. The machine speed can be adjusted from 50 to 1000 rpm by a transducer for wider applications.
- ☞ The machine is equipped with cooling system which can cool down the specimen during primary grinding so as to prevent overheating and damage the metallographic structure. The left disc is for primary grinding and normal grinding, right disc is for polishing. Featuring easy operation and reliable performance, it is an indispensable device for the factories, research institutions and college labs to prepare metallographic specimen.

Specifications:

Model	MP-2B
Dia. of Polishing disk (mm)	Φ 200
Speed of Polishing disk (rpm)	50-1000
Dia. of grinding disk (mm)	Φ 230
Speed of grinding disk (rpm)	50-1000
Dia. of Sander Paper (mm)	Φ 200
Motor Power (Watt)	550 (YSS7124)
Voltage (Volt)	110/ 220 VAC
Overall Dimension (mm)	700×700×300
Weight (Kg)	45
